

WHAT DO YOU KNOW ABOUT 5G?

Please join Coloradans For Safe Technology and Concerned Citizens of Denver for a virtual Town Hall Meeting about the 5G towers being installed in our neighborhoods. Leading scientific and legal experts will answer critical questions about the impacts of 5G.

What are all those towers for and why are there so many?

What does 5G do and how does it work?

HAS IT BEEN TESTED FOR SAFETY?

Is it safe for children? Pets? The environment?

Why has there been ZERO citizen participation or input?

How will it affect the PROPERTY VALUES of our homes?

Why have other cities and countries HALTED their 5G plans?

How can we STOP it in here in Colorado?

Join us Wednesday, February 17, at 3 PM MST for this important meeting.

Pre-register and download this flyer to share at www.co4safetech.com

Please invite friends, neighbors, and all elected officials!
