

CALL TO ACTION

Thank you for attending our Town Hall Meeting. By every measure it was a great success! Now it is up to all of us to take what we learned and put it into bold, impactful action. The purpose of the meeting was not merely to inform, but also to mobilize.

What can we do about it? What are YOU going to do about it? This is a very clear and crucial Call to Action. Everyone needs to be engaged. Here is what you can do.

1. PARTICIPATE! The first, easiest step is to join Coloradans for Safe Technology. Volunteer your skills and talents. Simply press "VOLUNTEER" here (insert live link) and sign up. Your information is secure and will be used only for purposes of organizing to stop the proliferation of 5G microwave antennas in Colorado.. If you are EMF Sensitive, be sure to let us know in the comments section. Let's work together to protect your RIGHTS.

Meet up with folks in your neighborhood who want to work to stop the 5G rollout. If you would like to initiate a group/partner with others in your community, please indicate this in the comments section, and share the location you would like to do this in, e.g. Denver. Find your tribe!

2. EDUCATE! Knowledge is POWER. Educate yourselves. Learn everything you can about 5G and EMF. Perhaps find a certain aspect that interests you and dive deeply into that. Educate your friends and neighbors. Take what you learn and share it. Explore our website under resources, and fact sheets, as well as those of these great organizations:
www.5gcrisis.com
www.ehtrust.org
www.bioinitiative.org,
www.childrenshealthdefense.org/known-culprits/electromagnetic-fields-wireless-technologies

To see the towers scheduled for Denver visit:

3. ADVOCATE!

Contact your local elected officials including City Council Members, Mayors, and school board members. Let them know that the unregulated, out of control rollout of 5G in your neighborhood is unacceptable. Encourage them to demand that every Small Cell Antennae installed in your city has full liability insurance coverage, including for damage and injuries caused by Electromagnetic Frequency Pollution. Find Denver City Council Members here:

<https://www.denvergov.org/Government/Departments/Denver-City-Council/Council-Members>

Contact your State Legislators and urge them to repeal [Colorado House Bill 17-1193](#). Call, email, and send letters. Find your State Legislator here: <https://leg.colorado.gov/find-my-legislator>

Develop meaningful relationships with all of your elected officials. Your City Council Member, State Representative, and State Senator should all know you by name and why this is an important issue to you as their constituent. Write letters to the Editors of your local papers.
